PROFESSIONAL SUMMARY

Motivated Computer Science Engineering (AI & ML) student at Parul University, passionate about building scalable Python-based applications and solving real-world problems. Proficient in Python, JavaScript, and DSA with hands-on experience in backend development using Flask, FastAPI, and SQLAlchemy. Experienced in building full-stack applications, ML pipelines, and AI-powered tools. Solved 100+ LeetCode problems. HackerRank certified in Python, React, and Java. Seeking Software Engineer or Python Developer internship or full-time opportunities.

EDUCATION

B.Tech — Computer Science & Engineering (AI & ML) Parul University, Gujarat	2023 – 2027
Higher Secondary (Maths, Physics & Chemistry) Narayana Junior College, Pulivendula	2021 – 2023
Secondary School Education S.M.M.S High School, Pulivendula	2020 – 2021

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, Java
Frameworks & Libraries: FastAPI, Flask, React.js, Node.js, Pandas, NumPy, Scikit-learn, SQLAlchemy
Databases: MySQL, MongoDB, PostgreSQL
Tools & DevOps: Microsoft Excel, Power BI, Jupyter Notebook, Git, GitHub, Docker, Postman, GitHub Actions (CI/CD), VS Code
Cloud & Testing: AWS S3, Pytest, RESTful API Design

PROJECTS

BIForge — Enterprise AI Business Intelligence Platform

Tech Stack: Python, Flask, Pandas, NumPy, Scikit-learn, PostgreSQL, SQLAlchemy, Plotly, Anthropic Claude AI
GitHub: github.com/Aravind628187

- Built a full-stack Enterprise Business Intelligence Platform using Python and Flask with a Natural Language Query Engine that converts plain English into executable Python code, generating interactive Plotly charts and data insights automatically.
- Implemented 5 Machine Learning algorithms (KMeans Clustering, PCA, Isolation Forest, Linear Regression, Anomaly Detection) using Scikit-learn with automated data preprocessing, missing value handling, and statistical testing using SciPy.
- Integrated Anthropic Claude AI API for intelligent code generation and built automated Excel (OpenPyXL) and PDF (fpdf2) export pipelines with formatted reports, supporting CSV, Excel, JSON, and Parquet file formats.

AI Resume Analyzer System

Tech Stack: Python, Flask, FastAPI, Google Gemini AI, HTML, CSS
GitHub: github.com/Aravind628187/ai-resume-analyzer-pro

- Developed an AI-powered resume analyzer using Flask and Google Gemini AI for smart feedback and analysis.
- Built RESTful API endpoints using FastAPI to handle resume uploads and return structured AI-generated feedback.
- Implemented PDF parsing with PyPDF2 and AI-based text processing using Python to extract resume insights.
- Analyzed resume content with Pandas to deliver ATS score, missing keywords, and improvement recommendations.

CERTIFICATIONS & ACHIEVEMENTS

Certifications

- Data Science & Analytics — HP LIFE (HP Foundation) | Jun 2026
- Java (Basic) — HackerRank
- React (Basic) — HackerRank
- Python (Basic) — HackerRank
- Android App Development Bootcamp (Kotlin) — Udemy
- ICAT — Internship Common Aptitude Test

Achievements

- Solved 100+ problems on LeetCode covering arrays, strings, recursion, and dynamic programming.
- Participated in Teliport Season 3 (organized by Tata Elxsi) as part of Team creative code — Parul University (Jun 2026).
