PROFESSIONAL SUMMARY

Motivated Computer Science Engineering (AI & ML) student at Parul University, passionate about building scalable full-stack applications and solving real-world problems. Proficient in Python, JavaScript, and DSA with hands-on experience across the MERN stack and backend development using Flask, FastAPI, and SQLAlchemy. Experienced in building AI-powered platforms, Machine Learning pricing engines, and secure, production-ready web applications. Solved 100+ LeetCode problems. HackerRank certified in Python, React, and Java. Seeking Software Engineer or Python Developer internship or full-time opportunities.

EDUCATION

B.Tech — Computer Science & Engineering (AI & ML) Parul University, Gujarat	2023 – 2027
Higher Secondary (Maths, Physics & Chemistry) Narayana Junior College, Pulivendula	2021 – 2023
Secondary School Education S.M.M.S High School, Pulivendula	2020 – 2021

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, FastAPI, Flask, Pandas, NumPy, Scikit-learn, SQLAlchemy

Databases: MySQL, PostgreSQL, MongoDB

Tools & DevOps: Git, GitHub, Docker, Postman, VS Code, Microsoft Excel, GitHub Actions (CI/CD)

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), RESTful API Development, Authentication (JWT), MVC Architecture

PROJECTS

HUB Cars — AI-Powered Car Marketplace

Tech Stack: React.js, Node.js, Express.js, Python, Flask, Scikit-learn, JWT, Multer

GitHub: github.com/Aravind628187/car-price-prediction-system

- Built a full-stack automotive marketplace enabling users to buy, sell, and discover vehicles, integrating a React/Vite frontend, a Node.js/Express backend, and a Python microservice-based ML pricing engine.
- Developed an AI-powered price prediction system using Scikit-learn to estimate Fair, Good, Excellent, and Dealer price ranges from brand, model, year, kilometers driven, and condition.
- Implemented secure JWT-based authentication with bcrypt password hashing, Multer-based image upload management, auto-expiring listings, and Google Maps-integrated showroom discovery.

BiForge — Enterprise AI Business Intelligence Platform

Tech Stack: Python, Flask, Pandas, NumPy, Scikit-learn, PostgreSQL, SQLAlchemy, Plotly, Anthropic Claude AI

GitHub: github.com/Aravind628187/enterprise-ai-bi-platform

- Built a full-stack Enterprise Business Intelligence Platform using Python and Flask with a Natural Language Query Engine that converts plain English into executable Python code, generating interactive Plotly charts and data insights automatically.
- Implemented 5 Machine Learning algorithms (KMeans Clustering, PCA, Isolation Forest, Linear Regression, Anomaly Detection) using Scikit-learn with automated data preprocessing, missing value handling, and statistical testing using SciPy.
- Integrated Anthropic Claude AI API for intelligent code generation and built automated Excel (OpenPyXL) and PDF (fpdf2) export pipelines with formatted reports, supporting CSV, Excel, JSON, and Parquet file formats.

CERTIFICATIONS & ACHIEVEMENTS

Certifications

- Data Science & Analytics — HP LIFE (HP Foundation) | Jun 2026
- Java (Basic) — HackerRank
- React (Basic) — HackerRank
- Python (Basic) — HackerRank
- Data Analytics Job Simulation — Deloitte (Forage) | Jul 2026
- ICAT — Internship Common Aptitude Test

Achievements

- Solved 100+ problems on LeetCode covering arrays, strings, recursion, and dynamic programming.
- Participated in Teliport Season 3 (organized by Tata Elxsi) as part of Team Creative Code — Parul University (Jun 2026).
